

Assignment 2 Studio Slogans By Tracey Ho

I chose this slogan because it represents my disability with Autism, I wanted to be very special. The reason why there are four colors is because they represent the theme and symbols that are acceptance. I think of how being Autistic can be difficult sometimes, because of lack communications skills and knowing your levels can describe your ways of connections and skills. The reason why Autism awareness is always important in the month of April is the start of Spring for a new beginning. It has been there for many years. Autism Awareness month started in April 1970. Autism Awareness month was founded in April by Bernard Rimland, Ph.D., a psychologist and autism researcher. He chose the month of April to coincide with his son's birthday, as well as the start of spring-a time for new beginnings. I think they still do events in Autism in special ways, probably in education skills. That's why this slogan makes me feel that I'm never alone from being autistic there are other people in the world who are autistic that can be different from others. Because I learned it from what type I am a level 1 or 2. I used four acrylic paints Red, Blue, Green and Yellow and added newspapers or flyers to cut out the words as the text to stand out properly with a finishing touch of Gloss medium to make it shiny.

THE THREE LEVELS OF AUTISM

1.

LEVEL 1 Requiring Support

- Lowest Level and "Highest Functioning"
- Difficulty initiating social interactions
- Decreasing interest in social interactions
- Struggling with switching between activities
- Organizing and planning problems

2.

LEVEL 2 Requiring Substantial Support

- Noticeable social impairments even with support
- Problems with verbal and nonverbal social communication
- Struggling coping with change
- Changing focus or activities can cause distress
- Frequently appearing restrictive or repetitive behaviors

3.

LEVEL 3 Requiring Very Substantial Support

- Severe problems with verbal and nonverbal social communication
- Frequently appearing restrictive or repetitive behaviors that interfere with daily functioning in all aspects of life
- Changing focus or activities cause severe distress
- Extreme difficulty coping with change
- Rarely speaking logically and with few words
